Connections and neighbourhoods

- The **British firm** Ryder Architecture (London and Newcastle) is collaborating with TFP Farrells (Hong Kong) to create a medical city in Dalian, China

- TFP Ryder's project includes an **organ transplant centre**. The foreigner-friendly medical city will host world-class resort facilities including “beauty care”

- Chinese authorities approved the Dalian medical city at an estimated cost of several billion pounds. The project is reportedly worth 300 million to TFP Ryder.

Case Study : Global Partnership 全球合作伙伴

– UK TFP Ryder Healthcare Project: – Peer Review on Oasis Hospital (明德医院) in Beijing

- TFP Ryder Healthcare sponsored 'UK Night' at the very first Hospital Build China exhibition in April 2011 and first met Oasis Healthcare at this event.
- TFP Ryder Healthcare joined UKTI Hospital Build mission in August 2011 and visited Oasis' new Beijing hospital project.
- A MoU with Oasis was signed on 8 November 2011 witnessed by **UK Department of Health Minister Anne Milton** (英国卫生部副部长)
- TFP Ryder Healthcare have produced a peer review of the new Oasis Hospital to ensure that the highest measure of patient comfort and environmental safety have been met.
- TFP Ryder Healthcare will co-operate for the development and design of OASIS as it grows to meet its patients' needs.
- TFP Ryder Healthcare will support OASIS on improving health and lives of patients promoting sustainable development.

Newcastle architects joining forces with China

A NEWCASTLE firm of architects has formed a joint venture with a leading London practice to secure work in the emerging Chinese healthcare market. Ryder Architecture, which employs 80 staff after cutting 60 posts since the start of the recession, has teamed up with the practice started by Sir Terry Farrell, the inspiration behind the redevelopment of Newcastle Quayside.

CONGRESSIONAL RECORD— HOUSE H8299, *December 8, 2011*

Mr. PITTS. Madam Speaker, an article in last Monday's Weekly Standard reveals the systematic execution and harvesting of organs in China's prisons.

The article provides firsthand accounts of the targeted elimination of religious prisoners, prisoners of conscience, and political opponents of the regime. Minorities, including Falun Gong, Uyghurs, House Christians, and Tibetans have been executed, followed by organ transplant surgeries—some being performed while the victims are still alive, numbering in the tens of thousands.

Furthermore, foreign companies are already making investments to benefit off of the thriving organ transplant market. Pharmaceutical companies like Roche and Isotechnika Pharma have been involved in clinical drug testing of transplant patients. **A British firm, TFP Ryder Healthcare, is proposing a medical facility that would include an organ transplant centre.**

Transplant Unit	Response
St James University Hospital, Leeds	“declines to provide this information.”
Royal Liverpool University Hospital	“numbers contained within the answer to this question are low... this information is exempt under section 40 of the Freedom of Information Act as it is classed as personal data.”
Nottingham City Hospital	“the Trust holds information that falls within the description specified in your request. However, we estimate that the cost of complying with your request would exceed the appropriate limit... in determining whether the Trust holds the information, and in locating, retrieving and extracting information.”
